PRODUCT

BRILLO (M8101)

FEATURES

BRILLO is a silicon wax which gives an excellent polish and a good water/oleo repellence and can be used on any kind of natural stone and lithoid materials.

BRILLO is a straight-chain polydimethylsiloxane modified with fluorinated groups. It has an hydro repelling action by penetrating into materials up to 4 mm and has polishing action thanks to silicone components. **BRILLO** is permeable to vapour; processed surfaces keep totally breathable.

It is available a new version black. It is particularly suitable for dark materials.

TECHNICAL DATA SHEET

Specific weight	1270 \pm 20 g/l	(MI 001)
Physical state	Liquid	
Colour	Slightly opaque, black	

STORAGE

Keep the container well closed and stored in a cool (temperature below 25°C) and ventilated environment for a maximum period of 12 months from the date of production marked on the tin. Avoid direct sun exposure.

SAFETY RULES

Keep the place ventilated while applying the product and when it dries. It is recommended the use of personal protective equipment during application. Read carefully the safety data sheet before application.

STORAGE

BRILLO is supplied ready-to-use. Application should take place on dry surfaces by using low-pressure airless spray, brush or roller: in any case take care to ensure an even application. Preliminary tests shall determine the right quantity of the product to be used since that depends on the different material absorption. Once applied, allow it to dry for a few minutes, then wipe it with a dry and clean cloth for the finishing polish.

All surfaces not to be treated must be protected by plastic sheets.
